Professional Summary

Second-year Computer Science student with production-grade software development experience and a passion for technology and music. Successfully delivered mission-critical applications at HALO Systems using modern web technologies. Combines strong programming fundamentals across multiple languages with practical experience in real-time systems, collaborative development, and Agile methodologies. Eager to apply technical expertise and genuine enthusiasm for music technology to contribute to Serato's world-leading audio software.

Experience

HALO Systems by Tag IT

Auckland, New Zealand

SOFTWARE ENGINEER INTERN

Dec. 2024 – Feb. 2025

- Engineered and deployed production-grade HMI Dashboard using Vue.js and TypeScript, enabling real-time monitoring of agricultural systems with 40% performance improvement.
- Collaborated with development teams on live mission-critical projects using Agile methodologies and Test Driven Development practices.
- Implemented real-time data visualization with geospatial mapping using Mapbox and GeoJSON, providing intuitive user interfaces for complex system monitoring.
- Developed reusable SVG-based component library, reducing development time for similar projects by 60% and improving team productivity.
- Architected Python backend services for efficient real-time sensor data processing, handling concurrent data streams from multiple locations.
- Applied modern development practices including Git version control, code reviews, and collaborative problem-solving.

Costas Taverna Greek Restaurant

Christchurch, New Zealand

CHEF DE PARTIE

Jun. 2019 – Nov. 2022

- Led cross-functional team of 5 kitchen staff, demonstrating strong leadership and communication skills in high-pressure, fast-paced environment.
- Improved operational efficiency by 25% through implementation of new workflow processes and creative problem-solving.
- Developed attention to detail and precision under pressure—skills that transfer directly to software development and debugging.

Projects

Full-Stack Todo List Application

github.com/realYushi/todo-list

PERSONAL PROJECT

2024

- Independently designed and developed comprehensive task management system with modern, responsive UI using React and TypeScript.
- Built robust backend services using .NET Core and EF Core with SQL Server, implementing secure authentication and data management.
- Established automated deployment pipeline using GitHub Actions and Azure services, achieving 99.9% API uptime.
- Reduced deployment time by 70% through CI/CD implementation, demonstrating DevOps best practices.
- Applied software engineering principles including clean architecture, error handling, and performance optimization.

My Recipe Book: Full-Stack Web Application

github.com/realYushi/my-recipe-book

PERSONAL PROJECT

2025

- Developed full-stack recipe management application using React Router, Node.js (Express.js), and MongoDB with modern tech stack.
- Implemented web scraping functionality with Puppeteer to automatically import ingredients from external websites.
- Designed responsive, user-centric UI using React Router, Tailwind CSS, and Radix UI for optimal user experience.
- Integrated rich text editor (Milkdown) for detailed recipe instructions and enabled image export functionality.
- Containerized entire application using Docker and Docker Compose for streamlined development and deployment.
- Established comprehensive testing suite with Vitest and robust authentication using Firebase.

Education

Auckland University of Technology

Auckland, New Zealand

BACHELOR OF COMPUTER AND INFORMATION SCIENCES

Jul. 2023 – Jul. 2026 (Expected)

- GPA: 8.08/9.0 (High academic performance demonstrating strong fundamentals)
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Development Methodologies, Database Systems
- Official Transcript: [View Transcript](#)

Technical Skills

Programming Languages & Frameworks	JavaScript/TypeScript, Python, C#, Vue.js, React, Node.js
Development Tools & Practices	Git, Docker, GitHub Actions CI/CD, Vitest, Test Driven Development, Agile
Database & Cloud Technologies	MongoDB, SQL Server, Azure services, Firebase
Real-Time & System Design	WebSockets, live monitoring systems, performance optimization, responsive UI

Certifications

Microsoft Azure AI Fundamentals (AI-900), Demonstrates commitment to emerging technologies and continuous learning 2024

Interests & Music Technology Passion

- Music Technology Exploration: Active interest in audio software, DJ workflows, and music production tools including exploration of Serato products.
- Creative Coding: Exploring the intersection of technology and creative expression through software development.
- Software Development Communities: Active participant in coding challenges, technical workshops, and collaborative learning.
- Audio Software Research: Studying digital audio fundamentals, real-time audio processing, and music software design principles.
- Emerging Technologies: Continuous learning in cloud computing, software architecture, and modern development frameworks.

Key Strengths for Audio Software Development

- Production-grade experience with real-time systems and performance optimization for mission-critical applications.
- Strong collaborative skills and Agile development experience working with professional development teams.
- Passion for technology combined with genuine interest in music and creative applications.
- Proven ability to learn new technologies quickly and contribute meaningfully to team projects.
